

Equipment and Acceptable Use Policy

Version 3.2 · Owner: IT Department · Review: annually

1. Purpose

This policy covers company-issued equipment and the acceptable use of company systems.

2. Laptops

Each employee receives one company laptop. Laptops are replaced every 4 years, or earlier if they fail and cannot be repaired economically. Laptops must be locked when unattended and must not be left in vehicles.

3. Additional equipment

A second monitor, docking station or headset can be requested through an equipment request ticket. Requests require approval from your manager. Standard items are delivered within 5 working days.

4. Damage and loss

Damaged, lost or stolen equipment must be reported to the service desk within 24 hours. Lost or stolen devices are wiped remotely.

5. Battery safety

If a laptop battery is swelling, stop using the laptop immediately, do not charge it, and bring it to the IT desk. Do not post or courier a device with a swollen battery.

6. Software

Software may only be installed from the approved software catalogue in the company portal. Requests for new software go through a software request ticket and a security review.

7. Removable media

USB storage devices are blocked by default. Exceptions require approval from the security team and are reviewed every 6 months.

8. Personal use

Limited personal use of company equipment is allowed, provided it does not interfere with work, break the law, or involve storing personal files on shared drives.
